

Administrative Rule
Reference Policy 210

All interested parties, including administrators, school nurses and unlicensed persons, must be oriented to the self-administration of medication process. A task performance checklist should be utilized by the school nurse to demonstrate that all involved parties understand the procedural implications of student self- administration of medication.

Under the direction of the school administration, the school nurse will educate faculty members regarding the safe administration of emergency medication to students. Parents shall provide all emergency medication. Faculty members shall supervise self-administration of medication to students only under the direction of the school nurse and when designated by the school administrator.
